SKILLS

Languages: SQL, Python (Data Analysis)

Technologies & Tools: Apache Superset, Power BI, Excel, MySQL, Claude (Anthropic), Prompt Engineering

Core Competencies: Exploratory Data Analysis (EDA), Statistical Analysis, Data Mining, Dashboard Development

WORK EXPERIENCE

Aga Khan Education Service, India (Hybrid)

June 2026 - Present

Intern Data Analyst

- Cleaned, organized, and maintained educational datasets to ensure data accuracy and consistency
- Created analytical tables to track and evaluate student performance by grade level and academic year
- Designed interactive dashboards in Apache Superset to analyze overall school performance and monitor student progress through key performance metrics
- *Tools: Excel, SQL, Apache Superset*

Aga Khan Education Board, India (Remote)

Nov 2025 - May 2026

Intern Data Analyst

- Integrated Google Sheets data with Apache Superset to develop automated reporting dashboards
- Built and maintained interactive teacher status dashboards to monitor performance and key metrics
- Designed and developed insightful charts and visualizations to analyze educational and operational data
- *Tools: SQL, Google Sheets, Apache Superset*

EDUCATION

Mumbai University

2024 - 2027

Bachelor of Science in Information Technology

Relevant Coursework: Object Oriented Programming, Databases, Data Structures and Algorithms, Operating Systems

PROJECT WORK

- **Custom Claude Skills Toolkit:** Built a set of three custom Claude Skills – structured instructions that guide the AI to follow strict rules, helping it give more accurate and useful answers. Created specific tools to automate repetitive tasks: an ATS Resume Maker, a UI/UX Web Developer, and a Presentation tool that automatically drafts five unique introduction styles for presentations. Shared the complete toolkit on GitHub using simple text files (.md) and clear instructions so anyone can easily use them.
- **Human-to-AI Labor Economics:** Designed a Power BI dashboard analyzing economic shifts from human to AI labor. Built KPIs, industry-wise charts, and a Cost Ratio Donut Chart using a custom DAX measure. Added a Regulatory Moat slicer for dynamic filtering.
- **AI Job Market Trends (2020-2026):** Built a Power BI dashboard tracking AI job market trends using Python scripting for custom visuals. Included KPIs, salary analysis, skills demand breakdown, and a Tree Map by Company Type and Country.

AWARDS AND CERTIFICATES

- **Peer Teaching Session Recognition** – St. Joseph's College (Jan 2026): Conducted a session on "Giving Effective Prompts to ChatGPT for Project Work" for TYBAF and SYBSc-IT students, recognized by faculty for engaging delivery and clear explanations.
- **Generative AI Mastermind** – Outskill: Completed an intensive course on prompt engineering and applied AI, covering LLMs for business growth, workflow automation, and AI-driven marketing campaigns.
- **Deloitte Data Analytics Job Simulation** – Forage (Sept 2025): Completed consulting-grade data analysis and forensic technology tasks in a simulated professional services environment.
